Objective

In order to exchange data between various systems, LendingPad developed this guide to allow system-to-system (S2S) data exchanges for mutual clients. Highlighted fields below are the critical data points needed for bi-directional push/pull with outside 3rd-party systems. They include loan level data, key status dates and other participants information. Over time the data set will be expanded with revised versions of this guide.

LendingPad uses basic authentication with whitelist IP's or domain names for communication.

Key Information

Test Environment URL: https://testapi.lendingpad.com
Login Credentials: [to be assigned by LendingPad support team]
Live Environment URL: https://api.lendingpad.com
Login Credentials: [to be assigned by LendingPad support team]

"Import" method allows 3rd-party systems to create/add a new loan record in LendingPad.

"Export" method allows LendingPad to update 3rd-party systems every minute with changes.

Import Loan API Request

POST /integrations/import/loan

With this request, we will create a loan for you in our system. Please check out `input params` for what must be provided and what can be provided. As a response will be returned the ID of the created loan. The loan will be created per every request. Please save this ID in your system for future references, such as when you use our Export API below.

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
branch	Yes, if campaign isn't provided	guid	LendingPad will provide
campaign	Yes, if branch isn't provided	guid	LendingPad will provide
occupancy	Yes	integer; values: 1=Primary Residence, 2=Second Home, 3=Investment, 4=Other	
purpose	Yes	Integer; values: 1=Purchase, 2=CashOutRefinance, 3=NoCashOutRefinance, 4=Construction, 5=ConstructionPermanent, 6=Other	
appraisalValue	Yes	decimal	
purchasePrice	-	decimal	
loanAmount	Yes	decimal	
creditScore	-	integer	
loanType	Yes	integer; values: 1=Conventional, 2=FHA, 3=VA, 4=USDARuralHousing, 8=Other, 7=HELOC, 9=HELOAN	
term	-	integer	
noteRate	-	double (from 0 to 100); ie: 3.75	
propertyType	Yes	integer; 1=Attached, 2=Condominium, 3=Cooperative, 4=Detached, 5=DetachedCondo, 6=HighRiseCondo, 7=ManufacturedHome, 8=ManufacturedSingleWide, 9=ManufacturedDoubleWide, 10=ManufacturedMultiwide,	

		11=ManufacturedHomeCondoPUDCoOp, 14=PUD_Attached, 15=PUD_Detached	
units	Yes	integer; values: 1,2,3,4	
channel	-	integer; 5=Retail, 8=Direct	
otherFinancing	-	decimal	
applicationTakenDate	-	string; format: "MM/dd/yyyy"	
program	-	string	
ltvRatioPercent	-	double; ie: 3.75	
combinedLtvRatioPercent	-	double; ie: 3.75

}

```

Successful Response Example:

```

{
  "id": "a67f3df1-9292-44ee-9a39-09029495b664",
  "loanNumber": "R000001",
  "status": {
    "code": 1,
    "name": "Success",
    "description": null
  }
}

```

Unsuccessful Response Example:

```
{
  "id": null,
  "status": {
    "code": 2,
    "name": "Error",
    "description": "Error message description"
  }
}
```

Import Standard File API Request

POST /integrations/import/loan/file

With this request, we will create a loan for you in our system. Please check out `input params` for what must be provided and what can be provided. As a response will be returned the ID of the created loan. The loan will be created per request. Please save this ID in your system for future references, such as when you use our Export API below. The content type of the request should be "multipart/form-data".

Input Parameters

}

```

MISMO 3.4 Extension

LendingPad supports the import of additional information provided in the MISMO 3.4 file. The extension information should be added to a loan record with loan role type "SubjectLoan."

Example:

```

<EXTENSION>
  <OTHER>
    <LENDINGPAD>
      <CRITICAL_DATES>

```

```

<ApplicationTaken>yyyyMMdd</ApplicationTaken>
<Closed>yyyyMMdd</Closed>
<Funded>yyyyMMdd</Funded>
<Purchased>yyyyMMdd</Purchased>
<Processing>yyyyMMddTHHmssZ</Processing>
<InitialSubmission>yyyyMMddTHHmssZ</InitialSubmission>
<Approved>yyyyMMddTHHmssZ</Approved>
<Suspended>yyyyMMddTHHmssZ</Suspended>
<ConditionSubmission>yyyyMMddTHHmssZ</ConditionSubmission>
<ClearToClose>yyyyMMddTHHmssZ</ClearToClose>
<Denied>yyyyMMddTHHmssZ</Denied>
<Rescinded>yyyyMMddTHHmssZ</Rescinded>
<InShipping>yyyyMMdd</InShipping>
</CRITICAL_DATES>
</LENDINGPAD>
</OTHER>
</EXTENSION>

```

FNM 3.2 Extension

LendingPad supports the import of additional information provided in the FNM 3.2 file.

Field	Data Stream	Position	Length	Description

Import Documents API Request

POST /integrations/loans/documents/import

With this request, we will add a document to an existing loan for you in our system. Please check out `input params` for what must be provided and what can be provided. As a response will be returned the ID of the created loan document. The loan document will be created per request. The content type of the request should be "multipart/form-data".

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	LendingPad provides it in a loan import response
name	Yes	string	
description	-	string	
effectiveDate	-	string; format: "MM/dd/yyyy"	
Conditions			
id	-	guid	LendingPad unique identifier
referenceId	-	string	3rd party unique identifier

Typical Request Example:

```
contact = "3a239eb4-025d-45a7-8015-f177534c0e15"
company = "7ff28005-58b0-4584-9f13-109ee0d0c2ad"
loan = "677e2fca-a27f-47cd-aad2-ee6585d52fb1"
name = "Sample Document"
```

Maximum Request Example:

```
contact = "3a239eb4-025d-45a7-8015-f177534c0e15"
company = "7ff28005-58b0-4584-9f13-109ee0d0c2ad"
loan = "677e2fca-a27f-47cd-aad2-ee6585d52fb1"
name = "Sample Document"
description = "Sample Document Description"
effectiveDate = "04/23/2020"
conditions[0].id = "ba239eb4-025d-45a7-8015-f177534c0e15"
```

```
conditions[1].referenceId = "3rd-party-reference-id"
```

Successful Response Example:

```
{
  "id": "a67f3df1-9292-44ee-9a39-09029495b664",
  "status": {
    "code": 1,
    "name": "Success",
    "description": null
  }
}
```

Unsuccessful Response Example:

```
{
  "id": null,
  "status": {
    "code": 2,
    "name": "Error",
    "description": "Error message description"
  }
}
```

Import Loan Notes API Request

POST /integrations/loans/notes/import

With this request, we will add notes to an existing loan for you in our system. Please check out `input params` for what must be provided and what can be provided. As a response will be returned the ID of the import request.

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	LendingPad provides it in a loan import response
notes	Yes	array of strings	

Typical request Example:

```
{
  "contact" : "3a239eb4-025d-45a7-8015-f177534c0e15",
  "company" : "7ff28005-58b0-4584-9f13-109ee0d0c2ad",
  "loan" : "677e2fca-a27f-47cd-aad2-ee6585d52fb1",
  "notes": ["note a", "note b"]
}
```

Successful Response Example:

```
{
  "id": "a67f3df1-9292-44ee-9a39-09029495b664",
  "status": {
    "code": 1,
    "name": "Success",
    "description": null
  }
}
```

Unsuccessful Response Example:

```
{
  "id": null,
  "status": {
    "code": 2,
    "name": "Error",
    "description": "Error message description"
  }
}
```

Import Loan Conditions API Request

POST /integrations/loans/conditions/import

With this request, we will add conditions to an existing loan for you in our system. Please check out `input params` for what must be provided and what can be provided. As a response will be returned the ID of the import request.

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	LendingPad provides it in a loan import response
conditionReferenceId	No	string	3rd party condition unique identifier
category	Yes	integer; values: 1=Prior-To-Closing; 2=Warning; 3=At-Closing; 4=Internal Compliance; 5=Prior-To-Purchase	
type	Yes	integer; values: 0=Other; 1=DU; 2=LP; 3=Appraisal; 4=Income; 5=Asset; 6=Eligibility; 7=Credit Report; 8=Flood Report; 9=TRID; 10=VVOE; 11=Employment; 12=Hazard Insurance; 13=Down Payment; 15=REO; 16=Property; 17=Title; 18=Tax Return; 19=4506-T; 20=Subordination; 21=Mortgage Insurance; 22=Disclosure; 23=Sale Contract; 24=POA; 25=Closing Disclosure; 26=Lock; 27=Suspense	
description	Yes	array of strings	
responsibleParties	No	array of integers; values: 1=Lender; 2=Borrower; 3=Broker	

Typical request Example:

```
{
  "contact": "3a239eb4-025d-45a7-8015-f177534c0e15",
  "company": "7ff28005-58b0-4584-9f13-109ee0d0c2ad",
  "loan": "677e2fca-a27f-47cd-aad2-ee6585d52fb1",
  "conditionReferenceId": "ReferenceID123",
  "category": 1,
  "type": 0,
  "description": "A sample condition description",
  "responsibleParties": [2, 3]
}
```

Successful Response Example:

```
{
  "id": "a67f3df1-9292-44ee-9a39-09029495b664",
  "status": {
    "code": 1,
    "name": "Success",
    "description": null
  }
}
```

Unsuccessful Response Example:

```
{
  "id": null,
  "status": {
    "code": 2,
    "name": "Error",
    "description": "Error message description"
  }
}
```

Update Loan Conditions API Request

POST /integrations/loans/conditions/update

With this request, we will update existing loan conditions for you in our system. Please check out `input params` for what must be provided and what can be provided. As a response will be returned the ID of the import request.

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	LendingPad provides it in a loan import response
condition	Yes, if conditionreferenceid isn't provided	guid	LendingPad provides it in a import loan conditions response
conditionReferenceid	Yes, if condition isn't provided	string	3rd party loan unique identifier
category	Yes	integer; values: 1=Prior-To-Closing 3.2; 2=Warning; 3=At-Closing; 5=Prior-To-Purchase	
type	Yes	integer; values: 0=Other; 1=DU; 2=LP; 3=Appraisal; 4=Income; 5=Asset; 6=Eligibility; 7=Credit Report; 8=Flood Report; 9=TRID; 10=VVOE; 11=Employment; 12=Hazard Insurance; 13=Down Payment; 15=REO; 16=Property; 17=Title; 18=Tax Return; 19=4506-T; 20=Subordination; 21=Mortgage Insurance; 22=Disclosure; 23=Sale Contract; 24=POA; 25=Closing Disclosure; 26=Lock; 27=Suspense	
description	Yes	array of strings	
responsibleParties	No	array of integers; values: 1=Lender; 2=Borrower; 3=Broker	

Typical request Example:

```
{
  "contact": "3a239eb4-025d-45a7-8015-f177534c0e15",
  "company": "7ff28005-58b0-4584-9f13-109ee0d0c2ad",
  "loan": "677e2fca-a27f-47cd-aad2-ee6585d52fb1",
  "condition": "a67f3df1-9292-44ee-9a39-09029495b664",
  "conditionReferenceid": "ReferenceID123",
  "category": 1,
```

```
"type": 0,  
"description": "A sample condition description",  
"responsibleParties": [2, 3]  
}
```

Successful Response Example:

```
{  
  "id": "a67f3df1-9292-44ee-9a39-09029495b664",  
  "status": {  
    "code": 1,  
    "name": "Success",  
    "description": null  
  }  
}
```

Unsuccessful Response Example:

```
{  
  "id": null,  
  "status": {  
    "code": 2,  
    "name": "Error",  
    "description": "Error message description"  
  }  
}
```

Delete Loan Conditions API Request

POST /integrations/loans/conditions/delete

With this request, we will delete conditions in an existing loan for you in our system. Please check out `input params` for what must be provided and what can be provided.

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	LendingPad provides
condition	Yes, if conditionreferenceId isn't provided	guid	LendingPad provides it in a import loan conditions response
conditionReferenceId	Yes, if condition isn't provided	string	3rd party loan unique identifier

Typical request Example:

```
{
  "contact": "3a239eb4-025d-45a7-8015-f177534c0e15",
  "company": "7ff28005-58b0-4584-9f13-109ee0d0c2ad",
  "loan": "677e2fca-a27f-47cd-aad2-ee6585d52fb1",
  "condition": "66123274-7651-4822-9ac5-dad9f3fb5511",
  "conditionReferenceId": "ReferenceID123"
}
```

Successful Response Example:

```
{
  "id": "a67f3df1-9292-44ee-9a39-09029495b664",
  "status": {
    "code": 1,
    "name": "Success",
    "description": null
  }
}
```

Unsuccessful Response Example:

```
{
  "id": null,
  "status": {
    "code": 2,
```

```
"name": "Error",  
  "description": "Error message description"  
}
```

Get Loan Conditions API Request

GET /integrations/loans/conditions?contact=<contact>&company=<company>&loan=<loan>

With this request, we will return the list of loan conditions for you. Please check out `input params` for what must be provided.

Input Parameters

<i>Field</i>	<i>Required</i>	<i>Type, Supported Values</i>	<i>Description</i>
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	LendingPad provides it in a loan import response

Data Model

<i>Field</i>	<i>Type, Supported Values</i>	<i>Description</i>
id	guid	Condition identifier
referenceId	string	3rd party condition unique identifier
createdDate	string; ie: "2018-10-10T11:13:09"

        "name": "Other"
      }
    }
  }
],
"referenceId": null
}
```

Export Loan Conditions API Request

LendingPad exports the updated loan conditions (or loans in a batch of up to 25 loans) during 5 minutes after the loan was modified. The system will send this information back to 3rd-party servers. Please create a method that can handle the post with a JSON model from LendingPad. Please also provide URL and basic authorization information.

The POST method should return status code 200 in response if the request headers contain 'X-TEST' header. The request with this header is a test request that includes the sample data the 3rd party should not handle. The LendingPad uses this type of request to validate that the connection between the LendingPad and the 3rd party is active.

Data Model

<i>Field</i>	<i>Type, Supported Values</i>	<i>Description</i>
id	guid	Condition identifier
referenceId	string	3rd party condition unique identifier
createdDate	string; ie: "2018-10-10T11:13:09"	
createdBy	Name-Email object	
clearedDate	string; ie: "2018-10-10T11:13:09"	
clearedBy	Name-Email object	
category	Id-Name object; values: 1=Prior-To-Closing 3.2; 2=Warning; 3=At-Closing; 5=Prior-To-Purchase	
type	Id-Name object; values: 0=Other; 1=DU; 2=LP; 3=Appraisal; 4=Income; 5=Asset; 6=Eligibility; 7=Credit Report; 8=Flood Report; 9=TRID; 10=VVOE; 11=Employment; 12=Hazard Insurance; 13=Down Payment; 15=REO; 16=Property; 17=Title; 18=Tax Return; 19=4506-T; 20=Subordination; 21=Mortgage Insurance; 22=Disclosure; 23=Sale Contract; 24=POA; 25=Closing Disclosure; 26=Lock; 27=Suspense	
description	string	
responsibleParties	array of Id-Name objects; values: 1=Lender; 2=Borrower; 3=Broker	
Document details		

id	guid	Document identifier
name	string	
Document > Type details		
name	string	
type	Id-Name object;; values: Other = 1, CreditReport = 2, FloodReport = 3, AusFindings = 4, Vvoe = 5, MiCertificate = 6, TaxTranscript = 7, CreditReportGapReport = 8, Imlq = 9, FraudReport = 10, _4506T = 11, Appraisal = 12, AdverseActionStatement = 13, CreditPackage = 14, UcdFindings = 15, ClosingDisclosure = 16, LockConfirmation = 17, TitleIntegration = 18, EarlyCheckFindings = 19, UnderwritingApproval = 20, ESignedDocuments = 21, AssetVerification = 22, ConsumerUploaded = 23, ComplianceAudit = 24, DisclosureFee = 25, IdVerification = 26, BorrowerAuthorization = 27, Voe = 28, Ssa89 = 29, IntegrationPartyUploaded = 30, Ssr = 31, DisclosureDocument = 32, InitialDisclosures = 33Other = 1, CreditReport = 2, FloodReport = 3, AusFindings = 4, Vvoe = 5, MiCertificate = 6, TaxTranscript = 7, CreditReportGapReport = 8, Imlq = 9, FraudReport = 10, _4506T = 11, Appraisal = 12, AdverseActionStatement = 13, CreditPackage = 14, UcdFindings = 15, ClosingDisclosure = 16, LockConfirmation = 17, TitleIntegration = 18, EarlyCheckFindings = 19, UnderwritingApproval = 20, ESignedDocuments = 21, AssetVerification = 22, ConsumerUploaded = 23, ComplianceAudit = 24, DisclosureFee = 25, IdVerification = 26, BorrowerAuthorization = 27, Voe = 28, Ssa89 = 29, IntegrationPartyUploaded = 30, Ssr = 31, DisclosureDocument = 32, InitialDisclosures = 33	

Request Example:

```
[
  {
    "loan": "67efeee3-db11-4896-917d-ea751d2fd0f1",
    "conditions": [
      {

        },
        "description": "Sample condition",
        "responsibleParties": [],
        "type": {
          "id": 0,
          "name": "Other"
        },
        "clearedDate": null,
        "clearedBy": null,
        "createdDate": "2024-08-02T08:58:12Z",
        "createdBy": {
          "name": "FirstName LastName",
          "email": "test@email.com"
        }
      },
    ]
  }
]
```

```
"documents": [  
  {  
    "id": "e64ed04a-e820-4867-81a3-343fb50d7d86",  
    "name": "Document Name",  
    "type": {  
      "name": "Loan document type name",  
      "type": {  
        "id": 1,  
        "name": "Other"  
      }  
    }  
  }  
],  
"referenceId": null  
}  
]
```

Update Loan with Standard File API Request

POST /integrations/update/loan/file

With this request, we will update a loan for you in our system. Please check out `input params` for what must be provided and what can be provided. The loan will be updated per request. The content type of the request should be "multipart/form-data".

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	
type	Yes	integer; values: 1=FNM 3.2; 2=MISMO 3.4 URLA	

Request example:

```
{
  "contact" : "3a239eb4-025d-45a7-8015-f177534c0e15",
  "company" : "7ff28005-58b0-4584-9f13-109ee0d0c2ad",
  "loan" : "677e2fca-a27f-47cd-aad2-ee6585d52fb1",
  "type": 1
}
```

Successful Response Example:

```
{
  "id": "a67f3df1-9292-44ee-9a39-09029495b664",
  "status": {
    "code": 1,
    "name": "Success",
    "description": null
  }
}
```

Unsuccessful Response Example:

```
{
  "id": null,
  "status": {
    "code": 2,
    "name": "Error",
    "description": "Error message description"
  }
}
```

MISMO 3.4 Extension

LendingPad supports the import of additional information provided in the MISMO 3.4 file. The extension information should be added to a loan record with loan role type "SubjectLoan." For more information please reference the "Import Standard File API Request" section.

FNM 3.2 Extension

LendingPad supports the import of additional information provided in the FNM 3.2 file. For more information please reference the "Import Standard File API Request" section.

Update Loan API Request

POST /integrations/update/loan

With this request, we will update a loan date in our system. Please check out `input params` for what must be provided and what can be provided. Include the dates information that should be updated in the loan. The loan will be updated per every request.

Input Parameters

Field	Required	Type, Supported Values	Description
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	
Dates details

  "status": {
    "code": 2,
    "name": "Error",
    "description": "Error message description"
  }
}

```

Export Loan API Request

LendingPad exports the updated loan (or loans in a batch of up to 25 loans) during 5 minutes after the loan was modified. The system will send this information back to 3rd-party servers. Please create a method that can handle the post with a JSON model from LendingPad. Please also provide URL and basic authorization information. A LO's NMLS ID as well as his/her email address will be in the export request.

The POST method should return status code 200 in response if the request headers contain 'X-TEST' header. The request with this header is a test request that includes the sample data the 3rd party should not handle. The LendingPad uses this type of request to validate that the connection between the LendingPad and the 3rd party is active.

Data Model

<i>Field</i>	<i>Type, Supported Values</i>	<i>Description</i>
loanId	guid

Export Loan Document API Request

The system sends the loan document that contains file and key parameters to 3rd-party servers. Please create a method that can handle the multipart form data request from the LendingPad. Please provide the URL and basic authorization information.

The POST method should return status code 200 in response if the request headers contain 'X-TEST' header. The request with this header is a test request that includes the sample data the 3rd party should not handle. LendingPad uses this type of request to validate the connection between the LendingPad and the 3rd party is active.

Data Model

Field	Type, Supported Values	Description
loanId	guid	LendingPad provides it in a register loan request
loanDocumentId	guid	
name	string	
effectiveDate	string; ie: "1980-01-01T00:00:00"	
createdDate	string; ie: "1980-01-01T16:15:12"	
Type details		
id	integer; values: 1=Other, 2=CreditReport, 3=FloodReport, 4=AUSFindings, 5=VVOE, 6=MICertificate, 7=TaxTranscript, 8=CreditReportGapReport, 9=IMLQ, 10=FraudReport, 11=4506T, 12=Appraisal, 13=AdverseActionStatement, 14=CreditPackage, 15=UCDFindings, 16=ClosingDisclosure, 17=LockConfirmation, 18=TitleIntegration, 19=EarlyCheckFindings, 20=UnderwritingApproval, 21=ESignedDocuments, 22=AssetVerification, 23=ConsumerUploaded, 24=ComplianceAudit, 25=DisclosureFee, 26=IDVerification, 27=BorrowerAuthorization, 28=VOE, 29=SSA-89, 30=IntegrationPartyUploaded, 31=SSR, 32=DisclosureDocument, 33=InitialDisclosures	

name	string	
Selling Company details (Broker)		
id	guid	
nmlsId	string	
Buying Company details (Wholesale Lender)		
id	guid	
nmlsId	string	
loanReferenceId	string	3rd party loan unique identifier
conditionReferenceIds	list of reference ids	3rd party condition unique identifiers

Request Example:

```

loanId = "35005483-32c3-4d7b-864a-3679af489ecc"
loanDocumentId= "11115483-32c3-4d7b-864a-3679af489ecc"
name = "Loan Document Sample"
effectiveDate = "2023-08-01T00:00:00"
createdDate = "2023-07-15T16:34:07"
type.id = 14
type.name = "Credit Package"
sellingCompany.id = "7ff28005-58b0-4584-9f13-109ee0d0c2ad"
sellingCompany.nmlsId = "12345678"
buyingCompany.id = "1aa28005-58b0-4584-9f13-109ee0d0c3ac"
buyingCompany.nmlsId = "23456789"
buyingCompany.loanReferenceId = "a67f3df1-9292-44ee-9a39-09029495b664"
buyingCompany.conditionReferenceIds[0] = "ReferenceID-A"
buyingCompany.conditionReferenceIds[1] = "ReferenceID-B"

```

Export Standard File API Request

GET

/integrations/export/loan/file?contact=<contact>&company=<company>&loan=<loan>&type=<type>

With this request, we will export a loan for you in different file standards. Please check out `input params` for what must be provided.

Input Parameters

<i>Field</i>	<i>Required</i>	<i>Type, Supported Values</i>	<i>Description</i>
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
loan	Yes	guid	
type	Yes	integer; values: 1=FNM 3.2; 2=MISMO 2.3.1; 3=MISMO 2.4; 4=MISMO 2.6; 5=MISMO 3.3.1; 6= ULDD FNM; 7=ULDD FRE; 8=UCD FRE; 10=UCD FNM; 9=MISMO 3 Closing; 13=MISMO 3.4 Closing; 11=MISMO 3.4 FNM; 12=MISMO 3.4 FRE	

Get Loans API Request

GET /integrations/list/loans?contact=<contact>&company=<company>&user=<user>

With this request, we will export the list of loans (in a batch of up to 25 loans) for you. Please check out `input params` for what must be provided.

Input Parameters

<i>Field</i>	<i>Required</i>	<i>Type, Supported Values</i>	<i>Description</i>
contact	Yes	guid	LendingPad will provide
company	Yes	guid	LendingPad will provide
user	Yes	guid	LendingPad will provide
loanOfficer	No	string	
lender	No	string	
borrower	No	string	
loanType	No	integer; values: 1=Conventional, 2=FHA, 3=VA, 4=USDARuralHousing, 8=Other, 7=HELOC, 9=HELOAN	
purpose	No	Integer; values: 1=Purchase, 2=CashOutRefinance, 3=NoCashOutRefinance, 4=Construction, 5=ConstructionPermanent, 6=Other	
status	No	Integer; values: Lead = 1, Processing = 33, Pre Qualify = 2, Registered = 32, Pre Approval = 3, Application Taken = 4, Broker Initial Submission = 30, Prospect = 27, Initial Submission = 22, Approved = 24, Suspended = 25, Pre Deny = 28, Broker Condition Submission = 31, Condition Submission = 23, Clear To Close = 26, Denied = 18, Withdrawn = 19, Not Accepted = 20, Incomplete = 21, Rescinded = 29, Closed = 12, Funded = 13, Post Closing = 14, In Shipping = 15, Purchased = 17, Servicing = 16	
state	No	string	
skip	No	int	
take	Yes	Int; Range 1-25	

Data Model

<i>Field</i>	<i>Type, Supported Values</i>	<i>Description</i>
--------------	-------------------------------	--------------------

Id	guid	Loan Identifier
loanNumber	string	
occupancy	Id-Name object; values: 1=Primary Residence, 2=Second Home, 3=Investment, 4=Other	
purpose	Id-Name object; values: 1=Purchase, 2=Cash Out Refinance, 3=No Cash Out Refinance, 4=Construction, 5=Construction Permanent, 6=Other	
appraisalValue	decimal	
totalLoanAmount	decimal	
creditScore	int	
loanType	Id-Name object; values: 1=Conventional, 2=FHA, 3=VA, 4=USDA Rural Housing, 8=Other	
loanStatus	Id-Name object; values: Lead = 1, Processing = 33, Pre Qualify = 2, Registered = 32, Pre Approval = 3, Application Taken = 4, Broker Initial Submission = 30, Prospect = 27, Initial Submission = 22, Approved = 24, Suspended = 25, Pre Deny = 28, Broker Condition Submission = 31, Condition Submission = 23, Clear To Close = 26, Denied = 18, Withdrawn = 19, Not Accepted = 20, Incomplete = 21, Rescinded = 29, Closed = 12, Funded = 13, Post Closing = 14, In Shipping = 15, Purchased = 17, Servicing = 16	
loanStatusDate	string; ie: "2018-10-10T11:13:09"	
loanTerm	int, nullable	
borrowersTotalIncomeAmount	decimal	
estimatedClosingDate	string; ie: "2018-10-10T11:13:09"	
Subject property address details		
street	string	
city	string	
state	string; state abbreviation, ie: "VA"	
zipCode	string	
county	string	
Borrower details		
id	guid	
firstName	string	

middleName	string	
lastName	string	
Borrower > Latest credit report identifiers		
identifier	string	
name	string	Credit report provider name
date	string; ie: "2018-10-10T11:13:09"	Credit report issue date
